

MPM is a Stavanger based company that is world leading within its business segment. We have an organization of enthusiastic and skilled people, covering a wide variety of disciplines. MPM makes the most sophisticated and accurate measurement instrument for the oil and gas industry. MPM's unique and patented technology and products have been developed in close co-operation with ten major Oil Companies. MPM is a fully owned subsidiary of FMC Technologies.

The MPM meter is a reliable instrument providing high accuracy in real life applications.

The MPM meter is based on new patented technology, resulting from a comprehensive userdriven development program. It's the one and only real combined Wetgas and multiphase meter (dual mode), which is capable of automatically configuring itself for variations in salt water properties.

The MPM meter offers unique user benefits, including remote access and operation, remote diagnostics, as well as in-situ verification functionality.

The MPM meter is designed for HP/ HT applications, with design pressure up to 15.000 PSI, and design temperatures up to 250°C.
